

Clean Delivery Kits—Saving Lives of Mothers and Babies

With many women expecting to give birth to their little babies in mud huts on the dirt floors, the Zambia Medical Mission Team has assembled and delivered several thousand clean delivery kits (CDK).

Using information from UNICEF and Save the Children, we added to their basic list of supplies. Each CDK distributed included: a candle and matches, half a bar of soap, 2 pair of gloves, a razor blade and string for the umbilical cord, a baby blanket, wash cloth, pain relievers, prenatal vitamins, and a sheet of plastic to go between the mother and the earth. It seems so simple, but a woman who uses this kit is 13 times more likely to survive her labor.

The Zambian women receiving these CDKs were extremely appreciative. You can imagine the blessings this bring to their families and their villages as their precious little one is born.

Expectant mother with Clean Delivery Kit provided to her in the name of Jesus.

An expectant Zambian woman examines the contents of a Clean Delivery Kit which she can use when her baby is born in a couple of months. She can hardly believe the wealth that has been provided to her in Jesus' name. The CDK's supplies and medicines were provided by many American families honoring their moms on Mother's Day.

Peggy Shankoti, Zambian nurse, gives a CDK to an expectant village mother. You can tell from her smiling face that this is indeed a blessing for her as well as potentially saving her life and the life of her expectant baby.

A \$10 gift will purchase 2 Clean Delivery Kits for an expectant mother in Zambia. We are making a special drive for Mother's Day by encouraging family and friends to donate to Zambia Mission in honor of their mother or friend. A personal note will be sent to individuals informing them of this gift. If you are interested in participating, please go to "Donate Now".
